**APPENDIX B RULE EMISSION LIMITS
[RULE 405 02-07 1986]**

The operator shall not discharge into the atmosphere from this equipment, solid particulate matter including lead and lead compounds in excess of the rate shown in Table 405(a)

Where the process weight per hour is between figures listed in the table the exact weight of permitted discharge shall be determined by linear interpolation

For the purposes of this rule emissions shall be averaged over one complete cycle of operation or one hour whichever is the lesser time period
